

BUILDING THE FUTURE IN 3D

Tiny House Living Newsletter

Quick to Build

Tiny houses can be built much faster than regular houses, which means they can provide shelter to people in need more quickly. This is especially important during challenging times due to national financial issues, when many people may suddenly find themselves without a home.

Typical Size

The typical American home is around 2,600 square feet, and the typical tiny house is between 100 and 400 square feet.

Tiny Homes Can Have:

Bedrooms
Living Room
Interior Storage

Bathrooms
Two Floors
Exterior Storage.

Kitchen
Office
Lockable Front Door

Tiny Home History

Tiny homes seem like a new trend; however, people have been living in small spaces for centuries.

For example, in the 19th century, settlers on the American frontier often lived in tiny cabins similar in size to modern-day tiny homes. Bathrooms were called outhouses and were located outside of the home.

WAYS TO LIVE TINY

Many modern-day tiny homes have electricity, AC, heat, a sink with running water, lights, an interior bathroom, a microwave, mini-fridge, and a hot plate.

Tiny House Storage Solutions

Tiny houses for homeless individuals give a sense of security, stability, and privacy.

According to the U.S. Department of Housing and Urban Development (HUD*), on any given night in 2022, over 540,000 people experienced homelessness in the United States. This includes individuals, families, and youth.
